DocuFlow demo

About 5 minutes. Open http://127.0.0.1:5173 Organization: demo
Passwords: .data/demo/credentials.txt Dummy files: demo/documents/

1. File an invoice (admin)

Files > Finance > Supplier Invoices > Upload invoice-ABC-1042.pdf

Say: It is read as soon as it arrives. Nobody types anything.

2. It fills itself in (admin)

Row > Details. Type is already Supplier invoice.
Invoice number INV-1042, due 2026-11-30, total 1,042.50 are filled in.

Say: Each value comes from the page, and a person can correct it.

3. Look and find (admin)

Row > View shows the page. Then Search: consulting
It finds the invoice and highlights the words.

4. Send it for approval (admin, then Felix)

Admin: Row > Workflow > Invoice approval > Start.
Sign out. Sign in as Felix. The bell shows a task.
Felix: Finance > Supplier Invoices > Workflow > Approve.
Sign in as admin > Workflow > Approve.

Say: Two steps in order, each with a deadline and a history.

5. Sign and stamp (admin)

Row > Sign, enter the password.
Then View, pick the APPROVED stamp, click the page.

Say: The signature is tied to this exact file.

6. Privacy punchline

Admin: HR > Employee Files > Upload board-minutes-november.pdf
Sign in as Felix. Search: budget (nothing). Search: consulting (the invoice).

Say: Search only returns what you may read.

Spare time

Forms > Leave request. Notifications and Tasks pages.

If it goes wrong

Nothing fills in: wait 5 seconds and reopen Details.
Cannot sign in: the organization is exactly demo.

The signature is an internal attestation, not a legal e-signature.
