DocuFlow demo

About 5 minutes, then extras. Open http://127.0.0.1:5174 Organization: demo
Passwords: .data/demo/credentials.txt Dummy files: demo/documents/

1. File an invoice (admin)

Files > Finance > Supplier Invoices > Upload invoice-ABC-1042.pdf

Say: It is read as soon as it arrives. Nobody types anything.

2. It fills itself in (admin)

Row > Details. Type is already Supplier invoice.
Invoice number INV-1042, due 2026-11-30, total 1,042.50 are filled in.

Say: Each value comes from the page, and a person can correct it.

3. Look and find (admin)

Row > View shows the page. Then Search: consulting

4. Ask a question (admin)

Ask: What is the total of the ABC invoice?
It returns the passage, labelled as extracts, with page and link.

Say: It never pretends to write an answer. Only your own documents are used.

5. Send it for approval (admin, then Felix)

Admin: Row > Workflow > Invoice approval > Start.
Sign in as Felix. The bell shows a task. Workflow > comment > Approve.
Sign in as admin > Workflow > Approve.

Say: Two steps in order, each with a deadline and a history.

6. Sign and stamp (admin)

Row > Sign, enter the password. Then View, pick APPROVED, click the page.

Say: The signature is tied to this exact file.

7. Privacy punchline

Admin: HR > Employee Files > Upload board-minutes-november.pdf
Sign in as Felix. Search budget: nothing. Ask: What is the annual budget?

Say: Search and answers only use what you may read.

Extras, if there is time (admin)

Audit trail: filter document., Export CSV, Check the trail is intact.
Compression: upload scan-delivery-note.pdf > Compress > about 80% smaller.
Retention: Row > Retention > class Invoices 7 years, hold Audit 2026.
Operations: health, usage and background jobs.
Forms: Leave request, try a bad date. Webhooks: try http://localhost/x.

If it goes wrong

Nothing fills in: wait 5 seconds and reopen Details.
Cannot sign in: the organization is exactly demo.

The signature is an internal attestation, not a legal e-signature.
